VIDAA

Product appearance may vary by screen size.

The Hisense U6 Pro ULED series delivers bright Mini-LED picture quality designed for comfortable viewing in real-world spaces. Featuring Pantone Validated Hi-QLED Color, it brings more accurate, lifelike colors to everything you watch. Smooth motion keeps fast scenes clear, while a built-in subwoofer adds deeper, richer sound for movies, sports, and everyday streaming. With intelligent picture optimization and a clean, modern design, the U6 Pro creates an easy, immersive big-screen experience you can enjoy any time of day.

Hi-QLED MiniLED

Mini-LED backlighting uses thousands of precise light zones to enhance contrast across the screen, revealing deeper shadows, brighter highlights, and more visible detail. Whether watching movies at night or sports during the day, the picture stays clear and impactful.

Dolby Vision · Atmos

Never miss a minute of the action – from your couch. Dolby Atmos, the next evolution of surround sound, creates a moving and immersive audio experience for every call of the ref and cheer of the fans.

Hi-View AI Engine

Intelligent processing analyzes each scene in real time, automatically optimizing brightness, contrast, and clarity. The TV continuously adapts to different content types – from movies to sports to gaming – so everything looks consistently better.

Total HDR Solution

Advanced HDR formats (IMAX Enhanced, Filmmaker Mode, Dolby Vision IQ, HDR10+ Adaptive) preserve creative detail and dynamically adjust brightness based on both content and room lighting. Enjoy deeper contrast and refined highlights that bring movies closer to a theatrical experience.

Native 144Hz Game Mode

High refresh performance keeps fast movement fluid and sharp, reducing blur during gameplay and live sports. The quick response helps you stay in control during competitive gaming while making rapid camera shots in shows and movies easier to follow.

Hi-QLED Color+ Pantone Validated

Color accuracy validated against professional standards ensures lifelike tones and balanced saturation. Skin tones, landscapes, and team uniforms appear natural and believable rather than exaggerated.

Built-in Subwoofer

Feel the rumble of every explosion and the beat of every soundtrack without external hardware. The built-in subwoofer delivers deep, punchy bass directly from the TV, adding cinematic weight and richness, for a fuller, more cinematic sound, bringing silver-screen energy to movies, sports, and games.

VIDAA TV

Experience instant entertainment with lightning-fast power-on and seamless high-speed performance. Enjoy effortless navigation with an intuitive UI, instant content discovery via universal search, optimal viewing through personalized recommendations, and quick TV setup with the VIDAA mobile app.
