

U7
SERIES

AVAILABLE SIZES

100" | 85" | 75"
65" | 55"

Product appearance may vary by screen size.

MiniLED
ULED

 Google TV

The Hisense U7 Series is the ultimate TV for sports and video games. It's enhanced with Mini-LED Pro technology, reaching up to 3,000 nits peak brightness, which makes for the sharpest contrasts, brightest lighting and most dramatic shadows. Soak up over a billion vibrant shades on your screen with QLED Color and see how every play unfolds. And 165Hz Game Mode Ultra powers smooth, tear-free gaming for even the most action-packed video games

Mini-LED Pro: Up to 3000 nits Peak Brightness & Up to 3000 Local Dimming Zones

See the realism of every shadow cast by the players and the ball. When your TV is backlit by thousands of tiny LEDs, your viewing experience gets even more precise. Think of the LEDs like thousands of pinpoints of light illuminating your screen. And Full Array Local Dimming creates deeper shadows and brighter highlights, while virtually eliminating halos.

Hi-View AI Engine Pro

Enjoy the game from home, but feel like you're there. Powered by the Hisense proprietary chipset, Hi-View AI Engine Pro automatically optimizes the picture and sound based on the content you are watching. This intelligent feature detects, analyzes and adjusts the details, depth and appearance of everything you watch or play, making every visual even more realistic.

2.1.2 Multi-Channel Surround

Hear the roar of the fans and the whistle of the ref as if you were at the game. The 2.1.2 Multi-Channel Surround creates an immersive home theater experience with a left and right channel, subwoofer with a deep bass and two up-firing speakers that project sound above you.

Total HDR Solution

See every basket and goal in all its glory. Total HDR Solution distinguishes between the colors you perceive on screen. That means ink-black blacks, not muddled tones and brighter, more vibrant colors with every HDR format, including Dolby Vision IQ, HDR 10+Adaptive, HDR 10, HLG and Advanced HDR by Technicolor.

Native 165Hz Panel & 165Hz Game Mode Ultra

Turbo power your gaming! 165Hz Game Mode Ultra has a Variable Refresh Rate of 48Hz to 165Hz, almost as fast as your reaction time. AMD FreeSync Premium Pro, Auto Low Latency Mode and Low Latency MEMC eliminate screen tearing and controller lag. And with our new Game Bar you can control multiple game settings right from your TV remote and on-screen display.

Anti-Reflection

Watch your team take on the championship in the morning, afternoon or evening light. Anti-Reflection minimizes the glare and reflections on the screen, no matter the room's lighting conditions, so you can see the picture in all of its vibrancy.

QLED Color

See the exact hue of every blade of grass on the field and every line on the court. QLED Color is made up of quantum dots—very small particles with the ability to display over a billion shades of color. This feature renders every frame with rich, vibrant and realistic color, ensuring that even the most minute details stand out.

Google TV

Entertainment you love. With a little help from Google. Google TV brings together movies, shows, live TV and more from across your apps and subscriptions and organizes them just for you.
