

U6 Pro

SERIES

AVAILABLE SIZES

100" | 85" | 75"
65" | 55"

Product appearance may vary by screen size.

MiniLED
ULED

fire tv

The Hisense U6 Pro ULED series delivers bright Mini-LED picture quality designed for comfortable viewing in real-world spaces. A glare-free, anti-reflection screen keeps the image clear even in bright rooms, while smooth motion and fuller sound make sports, movies, and everyday streaming more enjoyable. With intelligent picture optimization and a clean, modern design, the U6 Pro provides an easy, immersive big-screen experience you can watch any time of day.

Hi-QLED MiniLED

Mini-LED backlighting uses thousands of precise light zones to enhance contrast across the screen, revealing deeper shadows, brighter highlights, and more visible detail. Whether watching movies at night or sports during the day, the picture stays clear and impactful.

Dolby Vision · Atmos + Built-in Subwoofer

Never miss a minute of the action – from your couch. Dolby Atmos, the next evolution of surround sound, creates a moving and immersive audio experience for every call of the ref and cheer of the fans.

Hi-View AI Engine

Intelligent processing analyzes each scene in real time, automatically optimizing brightness, contrast, and clarity. The TV continuously adapts to different content types – from movies to sports to gaming – so everything looks consistently better.

Total HDR Solution

Advanced HDR formats (IMAX Enhanced, Filmmaker Mode, Dolby Vision IQ, HDR10+ Adaptive) preserve creative detail and dynamically adjust brightness based on both content and room lighting. Enjoy deeper contrast and refined highlights that bring movies closer to a theatrical experience.

Native 144Hz Game Mode

High refresh performance keeps fast movement fluid and sharp, reducing blur during gameplay and live sports. The quick response helps you stay in control during competitive gaming while making rapid camera shots in shows and movies easier to follow.

Anti-Reflection & Glare-Free

Advanced screen treatment minimizes glare from lamps and windows, so daytime sports stay visible, late-night movies stay immersive, and gaming remains clear from almost any seat in the room.

Hi-QLED Color+ Pantone Validated

Color accuracy validated against professional standards ensures lifelike tones and balanced saturation. Skin tones, landscapes, and team uniforms appear natural and believable rather than exaggerated.

Fire TV

Get right to the good stuff. Fire TV puts your favorite apps front and center on one main home screen. So you can quickly find shows, movies, and live TV you love without the endless scrolling.
