

Commercial-Style Range with 100% Shabbos Kosher Oven

when paired with **Shabbos Keeper**

100% Shabbos Compliant

The Shabbos Keeper automates flames and heating elements and also disables all sensors, alerts, lights, buttons and more.

Fully Automated

With the entire Jewish calendar built in through 2050, the Shabbos Keeper automatically enables and also disables Sabbath mode for you each week and every holiday throughout the year.

Tested & Trusted

Our product is endorsed by the highest rabbinical authorities in the U.S. and GE Appliances is a trusted partner of the Orthodox community.

POWERED BY

The Shabbos Keeper difference

Open the door as many times as necessary

Never before has this feature been available on ovens. During Shabbos or Yom Tov, the oven door may be opened multiple times, even while the oven is running. Using strict halachic guidelines, Zman Technologies has developed a unique method that allows the door to be opened and closed without affecting heating or other functions. Tested and 100% kosher certified.

Seamless switch

Each week and before every Yom Tov, the Shabbos Keeper will automatically prompt you to accept Shabbos or early Shabbos. After accepting, simply continue to cook as normal until Shabbos or Yom Tov arrives and watch as the oven automatically switches into Shabbos mode at the correct time; and also switches between Shabbos and Yom Tov when applicable. When Shabbos and Yom Tov coincide, Shabbos mode will always override.

Now cook on Yom Tov

The Shabbos Keeper uses two separate modes for Shabbos and Yom Tov. On Shabbos, the oven will go into an automatic warm mode. On Yom Tov, the oven will automatically cycle between warm and bake schedules, so you can fresh cook your Yom Tov meals.

Lights, buttons, door switches and sensors

The Shabbos Keeper automates flames and heating elements, and also disables all sensors, alerts, lights, buttons and safety shut-off features. Tested and 100% kosher certified.

Compatible with Cafe models:

C2Y366P2TS1	C2Y486P2TS1*	CGY366P2TS1
C2Y366P3TD1	C2Y486P3TD1*	CGY366P3TD1

Contemporary major appliances are advanced high-tech gadgets with multiple sensors and computers on board. The simple act of opening and closing a refrigerator or oven door can trigger a variety of changes to the appliance operation. Previous Shabbos mode solutions have resolved only some of the concerns related to their use on Shabbos and Yom Tov.

The Orthodox Union (OU) and Hisachdus HaRabbonim (CRC), two renowned kosher agencies, are pleased to announce, a historic alliance to improve the halachic standards of home appliance use on Shabbos and Yom Tov, with the joint certification of the GE *Shabbos Keeper*.

GE APPLIANCES

Developed by GE Appliances and Zman Technologies under Rabbi Ortner's supervision, *Shabbos Keeper* technology provides ultimate convenience for the Shabbos observer and are without halachic compromise:

- Shabbos and Yom Tov schedule automatically sets appliances and prompt users
- Door opening and closing are completely disengaged from appliance operations
- Refrigerator light illuminates for the duration of Shabbos and Yom Tov
- Option to open oven door multiple times during Shabbos
- Warm and bake modes for Yom Tov use

Shabbos Keeper modules are compatible with all new GE refrigerators and a growing number of GE ovens. Some GE ovens come with enhanced Shabbos mode pre-installed.
