

SACS9M2

SA-CS9M2 Active Subwoofer (2026)

Sony's CS Speaker series brings cinema sound home. Experience crisp, clear, immersive audio that brings movies and music to life. A perfect companion to Sony AV receivers.

Bullets

- Active Subwoofer
- 10 in. woofer delivers thumping bass
- Bass reflex enclosure for distortion-free, low-frequency sound
- Vibration suppression to provide tight, accurate bass
- Premium componentry ensures premium sound
- Reinforced cellular cone woofer for undistorted audio
- Compact design allows easy installation in tight spots
- 28-200 Hz frequency response
- Perfect match with Sony AV receivers

Features

10 in. Woofer

Enjoy deep, rich bass from this powerful active subwoofer. The 10 in. cone diaphragm moves a larger volume of air, producing powerful low-end resonance that makes bass sound rich and authentic. It reinforces low-frequency sounds in movies and music for a more immersive home theater experience.

Bass reflex enclosure

The subwoofer is built on a strong foundation with an enclosed structure designed to keep sound pure and natural. Bass reflex ducts suppress unwanted noise and improve low-frequency sound reproduction, delivering deep, powerful bass for music and movies.

Low vibration

Suppressing cabinet vibration is essential for tight, accurate bass. Unwanted vibrations are reduced by absorbing rear pressure waves and damping internal cabinet movement. Carefully selected materials and layout minimize vibration for greater clarity.

Premium Componentry

Premium componentry delivers exceptional sound. High-quality materials, including silicon steel plates in the woofer and thick winding materials, contribute to consistent, high-performance output.

Reinforced cellular cone woofer for undistorted audio

Many speakers use paper cones that flex over time, leading to distortion. Reinforced cellular cone woofers maintain their shape under pressure, allowing for stronger bass output without compromising audio quality.

Compact Design

Powerful and compact, this subwoofer is ideal for installation in tight spaces. The reduced baffle area minimizes sound field distortion for improved clarity and precision.

Perfect match for Sony AV receivers

The Sony CS Speaker Series is designed to pair seamlessly with Sony AV receivers, delivering a complete home cinema experience.

Specification

General Features	
Frequency Response	28 - 200 Hz
Model name	SA-CS9M2
Speaker system	Active subwoofer system
Magnetically Shielded type	No
Enclosure Type	Bass reflex
Cabinet Material	Wood
Grillenet	Detachable/Cloth
What's in the Box	
Supplied Accessories	AC power cord, Audio connecting cord, Instruction manual
General	
Cut-off Frequency	50 - 200 Hz
Subwoofer	1
Audio Specs	
Rated Impedance	3 ohms
Weight and Measurements	
Dimensions (Approx.) (WxHxD mm)	293 x 345 x 369 mm / 11 5/8 x 13 5/8 x 14 5/8 in

Mass (Approx. kg)	9.7 kg / 21 lb 7 oz
Speaker Unit	250 mm cone type x1
Power Output	125 W
Power	
Power Requirements (voltage)	120 V, 60 Hz
Power Requirements (frequency)	AC
Power Consumption	
Power Consumption (in Operation)	25 W
Inputs and Outputs	
Input Terminal Type	Pin jack / Speaker terminals (Push type)
Output terminal type	Speaker terminals (Push type)
Convenience Features	
Level adjust	Yes
Cut off Frequency adjust	Yes
Power Save Mode	Yes
Phase Switch	Yes
