- Chromecast built-in⁶
- Spotify connect⁴
- Multi-room music
- Sound calibration
- Bluetooth⁷
- Connect wirelessly to your tv⁷
- Adjust volume automatically
- Compatible with Sony Music Center⁸
- Hi-Res Audio compatible

Features

360 Reality Audio

Sony's 360 Reality Audio technology creates an audio experience that creates a new level of immersion¹. Sound comes from all around you, making it seem like you're on the stage or in the recording studio with the artist.

Ambient room-filling sound

Whether you're reading, cooking, working, or catching up with friends, ambient room-filling sound is the perfect accompaniment. Sound is diffused both horizontally and vertically to create just the right atmosphere anywhere in your home.

Immersive Audio Enhancement

SONY

Because 360 Reality Audio tracks incorporate three-dimensional sound location data, they're able to deliver the ultimate in ambient room-filling sound. But if they're not available, no problem – Immersive Audio Enhancement, a unique Sony algorithm, effectively delivers your favorite stereo tracks as ambient room-filling sound.

Seven precisely placed speakers

A trio of up-firing speakers spreads music vertically while three side speakers spread sound horizontally. These are complemented by a woofer, which floods the room with rich, deep bass, giving new life to all of your favorite music.

Wi-Fi enabled

Use a Wi-Fi connection to access your favorite internet music streaming services via your speaker and control the playlist from your phone⁵.

Works with Alexa

The SRS-RA500 works with Alexa, giving you the ability to control the speaker with your voice using compatible Alexa products³.

Works with Google Assistant

The SRS-RA500 works with the Google Assistant, giving you the ability to control the speaker with your voice using compatible Google Home products².

Chromecast Built-In

Stream music, online radio, and podcasts from your smartphone, tablet or laptop to your audio device. Just tap the Cast button.⁶

Spotify Connect

Play Spotify directly through your speaker using the Spotify Connect™ app on your device for full remote control.⁴

Multi-Room Music

The SRS-RA5000 can easily be added to a speaker group in the Google Home or Amazon Alexa app. You'll then be able to play different songs in different rooms, or the same music throughout your house, using the app or via your smart assistant.

Sound calibration

Wherever you set up your SRS-RA5000, you can calibrate it for optimal audio performance with the help of an internal microphone and unique Sony algorithm. Just hold the Immersive Audio Enhancement key on the body and the SRS-RA5000 starts calibration.

Bluetooth

Pair your speaker using Bluetooth® technology and start seamlessly streaming your music collection.⁷

Connect Wirelessly To Your TV

SONY

Want to enhance the sound from your TV? With a Bluetooth® connection, compatible BRAVIA® TVs will send audio wirelessly to that SRS-RA5000 for a more thrilling viewing experience. Lower latency means that what you hear syncs precisely with what you see on screen.

Adjust volume automatically

Some tracks play too loud and some are too quiet – so you can end up constantly adjusting the volume. The SRS-RA5000 solves this problem by analyzing every track and automatically playing them at a consistent volume – so you don't have to lift a finger.

Compatible with Sony Music Center

Download the Sony | Music Center app to your smartphone and enjoy wireless control of your music⁸. As well as selecting playlists or cueing the next song, you can also adjust settings like EQ.

Hi-Res Audio compatible

Enjoy the subtlest nuances of studio-quality sound in higher than CD quality with High-Resolution Audio. Passion for music unites every component from signal to speaker so it feels like the artist is performing right in front of you.
